Remote Backup Service

What happens to your data in a fire or burglary, or if your computer crashes? If you've ever worried about it, you need to use DigitalFire Computing's Remote Backup service. Your data is backed up nightly to our secure server, which is then backed up during the day to a second off-site location – so that you will never lose your critical data. With 128 bit encryption, only you have the password to unlock and view your files.

<i>Automatic Backup Features</i>			
Nightly Backups – 24 hrs/365 days per year	✓	✓	✓
Keep up to 2 weeks of versions	✓	✓	✓
Automatic Backup to Second off-site location	✓	✓	✓
